**INSTRUCTIONS
FOR USE OF THE
MR. BIKINIS™
BIKINI STENCIL**

Congratulations!

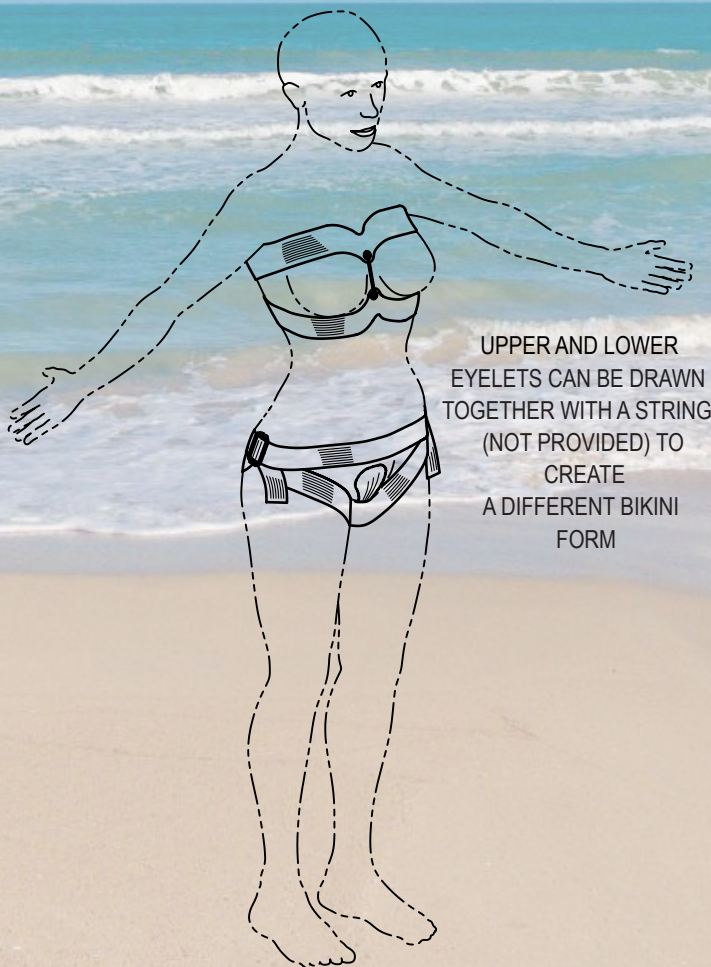

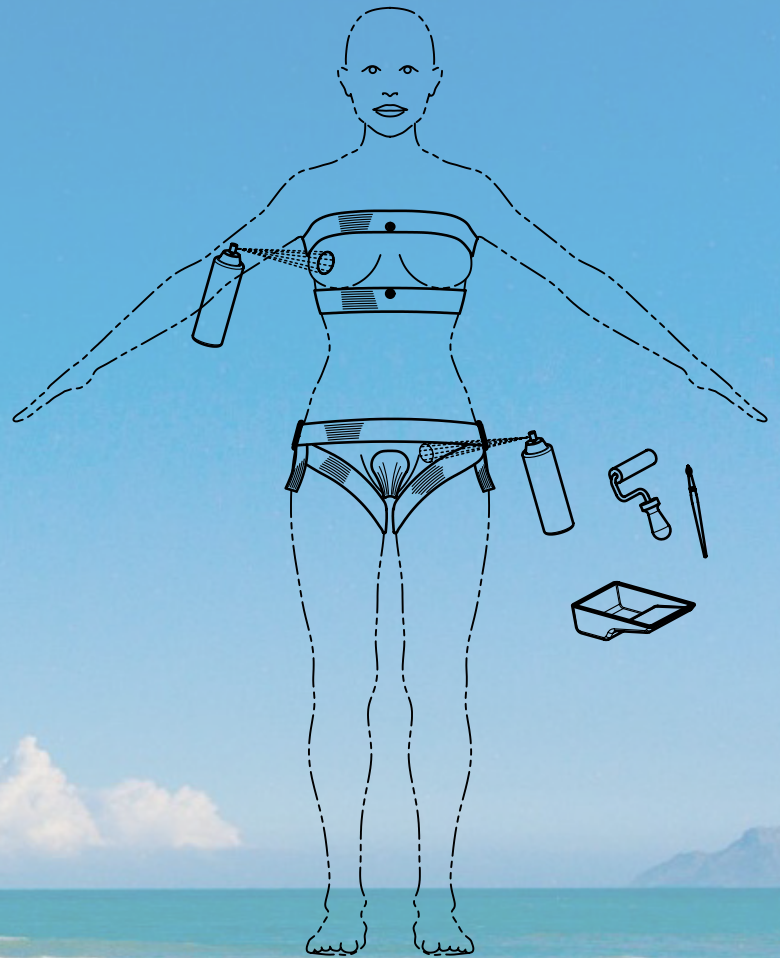

You've purchased the Mr. Bikinis™ body stencil, the world's first, do it yourself and patent pending bikini stencil. Follow the following guidelines when applying your body painted bikini. Remember, you need to use your own bodypaint and use your own brushes / rollers. Easiest when applied with the help of a friend!

Easiest when applied with the help of a friend!

Instructions:

Once stencils are in place, apply paint to the exposed bikini area preferably with a brush or roller (available at any hardware store) or with a pump sprayer (use aerosol or an airbrush only outdoors). Allow at least 10 minutes to dry before removing stencils, and enjoy! Embellish with any standard flat stencil (with a star, moon, heart motif) using other colors if you like. Be creative! Stick-on embellishments add flair. Note you can also add readily available body paint fixing spray to increase the life of your artwork.

UPPER AND LOWER
EYELETS CAN BE DRAWN
TOGETHER WITH A STRING
(NOT PROVIDED) TO
CREATE
A DIFFERENT BIKINI
FORM

As for where to get the body paints for clients in the US, we recommend "Proair Hybrid" (<https://www.showoffsba.com>) for an application that is waterproof and which can last the better part of a day (warning: it must be removed with alcohol and is therefore not appropriate for those with sensitive skin!). For those in Europe, we recommend Senjo-Color (available from Theatermakeup.de). However, any body paint will do, but as a general rule, the easier to clean, the less waterproof. Contact us at info@sportsstencils.pro with any questions you may have.

A vibrant tropical beach scene. The sky is a deep, clear blue, filled with large, fluffy white clouds. The ocean is a brilliant turquoise color, with white foam from waves crashing onto a sandy beach. Several dark, mossy rocks are scattered along the shoreline. The overall atmosphere is bright and sunny.
